Conflicts of interest reported:

Study characteristics

Study type:

Study site(s):

Study period(s):

Data sources used:

Participants

Number of participants (total):

Number of participants (treatment):

Number of participants (control):

Inclusion/exclusion criteria:

Hazard ratios for the following demographic subcategories, tick if available:

- Age
- Sex
- Ethnicity
- Tumour stage (T)
- Tumour stage (N)
- Tumour stage (M)
- Tumour grade
- Others (please state): _____

Outcome measures

Primary outcome:

- Overall survival

Secondary outcomes:

- Disease-free survival
- Orbital preservation

Additional outcomes published:

Outcome	Definition	Hazard Ratio

Statistical analysis

Information for forest plot construction:

- Hazard ratio directly stated
- Kaplan-Meier curve with numbers-at-risk
- Kaplan-Meier curve without numbers-at-risk

If numbers-at-risk is available, please include here:

Statistical analysis technique(s) used:
